Targeted skills

By the end of this module, you will know how to:

- add new measurements to an existing shapefile
- import a shapefile into CARTO
- append new measurements to an existing CARTO dataset

Data

Data to be used in this module can be found in the following folders:

`data/appending_data`

Exercise outline & memos

1. Open existing shapefile and import new measurements in QGIS

Open in QGIS the following shapefile:

`data/appending_data/safecast_part1.shp`

Import new measurements:

`data/appending_data/new_data.csv`

and save it as shapefile as explained in a previous exercise

2. Merge shapefiles
